Correct Marks : 2

Question Label : Multiple Choice Question

A business uses the First-In, First-Out (FIFO) method for inventory valuation. What is the core logic of this method?

Options :

6406537086808. ✔ The cost of the oldest items in stock is assigned to the goods sold first.

6406537086809. ✖ Inventory is always valued at its current market replacement cost.

6406537086810. ✖ Inventory is valued based on the average cost of all units available.

6406537086811. ✖ The cost of the most recently purchased items is assigned to the goods sold first.

Correct Marks : 2

Question Label : Multiple Choice Question

Why might a lender prefer to look at the Interest Coverage Ratio (ICR) instead of just the total Net Profit?

Options :

6406537086812. ✖ Because Net Profit includes non-operating income that cannot be used for interest.

6406537086813. ✔ Because ICR specifically measures the ability to service debt from operating liquidity.

6406537086814. ✖ Because Net Profit is always higher than ICR.

6406537086815. ✖ Because ICR excludes depreciation, making it a more conservative measure of profit.
